REMARKS

This is UNEVALUATED Information

25X1

1. Between 2 and 10 January 1951, only a few supply shipments left the Strausberg (W 53/V 15) Air Force Depot whereas the arrival of material increased. Several car-loads with aircraft accessories such as fuel tanks, cooling pipes, and elevator assemblies, were unloaded. Twenty small carts, covered with tarpaulins, also were unloaded. The only description possible was that the carts were about 1.3 to 1.5 meters long, 80 cm high, and fitted with three rubber wheels, about 30 cm in diameter. They were possibly starter units since they were to be pushed by hand. \*

25X1

2. Motor vehicles seen in the depot included teen and trucks not in the morning of 10 January. They were not loaded. Truck sections also left the depot. \*\*

25X1

3.

\* Comment. The carts were probably starter units. A further description of the unit would possibly indicate for which types of aircraft these starters are being used.
